

Which big selling (but not as big as it used to be) national paper is not aware...

Sunday, 13 August 2006

of a major documentary about it being prepared for TV examining...

criminal activity in the gathering of stories and...

criminal activity in the acquisition of material "for research purposes" and...

corruption in the higher reaches of executive expenditure and...

activities which amount to intent in the areas of encouraging crime?

Looks like a huge future expose.
