KIM NOVAK AND JAMES DEAN

Third song from Anticloning.

Again; same track; different song (dadadadadada); names in title and - I think you'll agree - an interesting lyric about my juvenile idols.

Huge crushes when I was a pre teen on Kim Novak (pictured) and James Dean (you know what he looks like!).

Catchy and fun and another song in the game of Anticloning.

Since everyone else seems intent on cloning.

And always was.
